

**Fact: The highest sensitivity in its field.  
You'd need your head testing to use anything else!**

Many aspirating smoke detection systems are specified because the very earliest detection of incipient fire situations is demanded. Stratos-HSSD® uses the unique ClassiFire® Artificial Intelligence system, which provides a sensitivity potential greater than other laser based aspirating systems. Stratos-HSSD® provides the highest degree of protection.

Stratos-HSSD® is unique in using Artificial Intelligence that **GUARANTEES** minimum

nuisance alarms and maintains optimum consistency of protection and **MAXIMUM** sensitivity.

Stratos-HSSD® is unique in using laser dust discrimination and filtration technology. Stratos-HSSD® is proven to operate reliably at high sensitivity in very dusty environments.

Stratos-HSSD® is approved by the following organisations...
