

Stratos®

ASPIRATING SMOKE DETECTORS

Contact Monitor

Key Features

- Interface other manufacturers' equipment to SenseNET system
- Monitors volt-free relay outputs from other systems
- 7 inputs
- Low current consumption of 40mA @24V DC

Description

The Stratos Contact Monitor enables the integration of other manufacturers equipment into Stratos/SenseNET system networks.

Relay outputs from other devices are monitored for alarm levels and fault. Two other general purpose inputs are also available.

RS485 communications connects the monitored device to a Stratos Command Module or PC Graphics Station for remote monitoring/alarm purposes.

Applications & Acceptance

Stratos Contact Monitor has been used successfully to integrate many older systems into new SenseNET PC controlled systems worldwide in environments ranging from Clean Rooms to Waste Recycling Centres.
